PROFESSIONAL SUMMARY

Software Engineer with 2+ years of full-stack engineering experience specializing in .NET 8, ASP.NET Core, Python, and Angular 18. Demonstrated technical leadership in managing event-driven microservices, deploying AI-driven autonomous calling systems, and mentoring junior developers. Proven track record in cutting API latency by 60%, automating background workflows for 5,000+ users, and accelerating feature delivery time by 30%.

TECHNICAL SKILLS

- **Programming Languages:** C#, Python, TypeScript, JavaScript, SQL
- **Backend Frameworks:** ASP.NET Core, .NET 8, REST APIs, Microservices, FastAPI, Flask
- **AI & Automation:** Autonomous AI Agents, Large Language Model Integration, Speech to Text, Text to Speech
- **Frontend Technologies:** Angular 6 through Angular 18, TypeScript, Tailwind CSS, Angular Material, HTML5, CSS3
- **Databases & Caching:** SQL Server, Database Design, MongoDB, Redis Caching
- **Architecture & Messaging:** System Design, Microservices Architecture, RabbitMQ, Hangfire
- **Developer Tools & Practices:** Visual Studio, VS Code, Postman, Git, GitHub, Azure, Docker, Agile, Scrum

PROFESSIONAL EXPERIENCE

Snovasys Software Solutions Pvt. Ltd. | Andhra Pradesh, India

Software Engineer

November 2024 – July 2026

- **Managed and scaled a secure Software as a Service platform** serving 5,000+ active users using .NET Core microservices, JWT authentication, and RBAC authorization.
- **Optimized database queries and Redis Caching** to cut API response latency by 60% across 20+ high-traffic analytics dashboards.
- **Automated background job processing workflows** using Hangfire and Gmail Services, saving 50+ business users 10+ operational hours weekly.
- **Directed automated Python data processing pipelines** to clean, validate, and bulk-load 100,000+ enterprise records efficiently into SQL Server.
- **Spearheaded RabbitMQ message queue integrations** achieving low latency, real-time data synchronization across 100% of decoupled microservices.
- **Mentored and supervised 3 junior developers** on clean coding standards, system design patterns, and effective debugging techniques.

Software Trainee Engineer

May 2024 – November 2024

- **Led end to end architectural frontend migration** from Angular 6 to Angular 18, accelerating page load speeds by 2x for 5 enterprise modules.
- **Designed a standardized Angular 18 UI Kit** with Tailwind CSS, cutting feature delivery time by 30% and CSS bundle size by 40%.
- **Collaborated across engineering teams** in Agile Scrum sprints to resolve 50+ critical production defects and optimize application performance.

KEY PROJECTS

Autonomous AI Calling Agent — Conversational Voice System

- Engineered an autonomous conversational voice agent using Python, Fast API and LLM orchestration APIs to handle real-time automated inbound/outbound calls, reducing manual support effort by 65%.
- Built low-latency Speech-to-Text and Text-to-Speech audio processing pipelines with real-time keyword detection and automated alerts, improving conversation response times by 50%.
- Designed an optimized call history and media retrieval module backed by Redis Caching and Webhooks, slashing audio search and transcript query latency by 50%.
- Accelerated feature delivery by approximately 40% utilizing AI-assisted rapid prototyping techniques while logging call metrics directly into SQL Server for 100% data auditability.

Field Staff by Time Champ — Real-Time Location Tracking System

- Architected a scalable microservices tracking platform using .NET Core and Angular 18 to process live field-staff telemetry, improving core system maintainability by 40%.
- Configured RabbitMQ message queues for real-time location synchronization across decoupled microservices, reducing network latency by 50%.
- Integrated Google Maps JavaScript API for dynamic map rendering, custom markers, geofencing, and live route navigation features.
- Enforced enterprise security utilizing JWT authentication protocols and fine-grained RBAC policies across 30+ endpoints, reducing security vulnerability risks by 30%.

Enterprise UI Kit & Shared Component Library

- Developed a reusable Angular 18 UI component library styled with Tailwind CSS, reducing development time for future enterprise projects by 45%.
- Improved cross-application UI consistency and reduced duplicate code implementation across engineering teams by approximately 70%.
- Published an interactive live demo documentation site enabling 20+ developers to preview, test, and integrate components seamlessly.
- Standardized component architecture and design tokens across product suites, accelerating feature delivery cycles by 30%.

ACHIEVEMENTS & CERTIFICATIONS

- Employee of the Year 2025** — Snovasys Software Solutions: Honored for contributions to backend performance, SaaS scalability, and platform reliability.
- Python Foundation Certification** — Infosys Springboard (Issued July 2023)
- Python for Data Science** — IBM Developer Skills Network (Issued August 2022)

EDUCATION

Degree / Qualification	Institution	Year	Grade
B.Tech in Computer Science & Engineering (Data Science)	RISE Krishna Sai Prakasam Group of Institutions	2020 – 2024	8.00 CGPA
Intermediate (MPC)	MSR Junior College	2018 – 2020	9.57 CGPA
SSC (10th Standard)	Sri Vignan High School	2018	9.50 CGPA
